

SHRI VISHNU ENGINEERING COLLEGE FOR WOMEN (AUTONOMOUS) :: BHIMAVARAM
Department of Computer Science and Engineering
IV B. Tech II SEM - Project Status Report

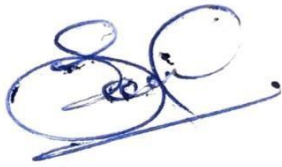

Section – B

A.Y: 2020-2021

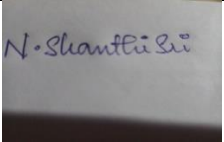

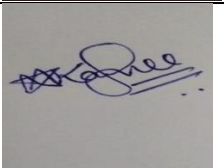

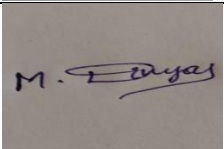

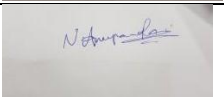

Project Batch No:	4
Project Title	Support Hub
Project Guide	Mr. P. Sunil
Project Aim (in 250 words)	<p>Support Hub is a Web based application that provides a platform for students and faculty to clarify their doubts through a web portal. Support Hub is a resource intended to provide the Students or end users with information and support related to a subject / technical information. The purpose of this application is usually to clarify doubts. In this application faculty members will be given rights to solve the tickets raised by the students.</p> <p>In this application students and faculty are logged into portal. After logging into the portal students are given opportunity to raise ticket for each and every doubt they have. Then it will be the task of the faculty to address the ticket and clarify the corresponding student doubts. After clarifying the doubts, the ticket which is generated, will be deleted. Students have the feasibility of raising the ticket to one concerned faculty without sending to all the remaining faculty.</p>
Literature survey (list of books, online material studied)	npm documentation, node js documentation through online.
Tasks / Modules completed so far(List the modules and percentage)	<p>1.Requirements and functionalities-</p> <p>2.Frontend design (student and faculty module)-</p>
Upcoming task or milestones	NA

Uncompleted Modules expected date of completion	
Name of Module 1	Student module
Name of Module 2	Faculty module
Name of Module 3	Admin module
Role of each Project member	Nunnaboyina Shanthi Sri-Frontend and back end development Nelli Kavya Sri- Frontend and backend development Medapati Divya Sarada- Frontend and backend development Neerukonda Anupama Rani- Frontend and back end development
Questions asked in previous Two reviews	(list out the questions and answers to it)
REVIEW 1:	
1.Why did you choose mango dB?	A. Since it supports non relational database. We have a facility to push any type of input like voice, text, image etc. and retrieve the data effectively.
2.How is your application different from Quora?	A. Quora consumes a lot of time and it is not a single page application, where as our application is a single page application resulting it consumes less time.
3.Why you are using Heroku?	A. In order to deploy, manage and hoist the application
REVIEW 2:	
1.What is the end output of your application?	A. Support Hub is a Web based application that provides a platform for students and faculty to clarify their doubts through a web portal.
2.Are the subjects provided in the application limited to only curriculum?	A. No, the subjects listed in the application are not limited to curriculum. We are including all the trending technologies.
3.How can you limit the load timing?	A. Since our application is single page and using React js provides high amount of responsiveness and we no need to load the page for every single operation.
